ANGUS BULLS

- Registered with Angus Breed Society
- Mount Adde HERD 21160

Performance Recorded Angus Cattle (PRAC)

Here at Mt Adde we are calving a large mob of Angus cows, some of which are AI mated, to the top bulls from NZ and overseas. These cows are run under strictly commercial conditions on typical dry Marlborough hill country.

The top 30 bull calves are wintered in one mob and performance recorded until sale.

Bloodlines utilised at Mt Adde are similar to leading studs throughout NZ.

All yearling heifers have been mated for over 10 years with in-calf rates consistently over 95% for the whole herd, proving we are breeding early maturing fertile cattle.

All herd sires are mating ability tested, eye muscle and fat scanned and BVD vaccinated.

All bulls - sold by private treaty
- C10 TB herd status
- EBL and BVD tested

A great deal of time and effort goes into selecting the genetics at Mt Adde with both the age-old art of stockmanship and new technologies utilised. We have a number of leading herd sires available for viewing with soundness, structure, conformation and longevity promoted. All bulls naturally mated and tested under commercial conditions.

**Mt Adde Angus
Top genetics
Realistic prices**

**Inquires and inspection
always welcome**
